Loop Capital Asset Management

Investment Mandate & Guidelines

Portfolio: PORT-001-GROWTH | Effective Date: 2026-01-01 | Version 3.2

1. Investment Objective

PORT-001-GROWTH seeks long-term capital appreciation through concentrated positions in high-conviction technology and consumer discretionary equities. The strategy targets outperformance versus the Russell 1000 Growth Index over a rolling 5-year horizon, with tactical cash reserves for liquidity management.

2. Asset Allocation Ranges

Asset Class	Target %	Minimum %	Maximum %
U.S. Large-Cap Equity	65%	50%	80%
U.S. Growth Equity (concentrated)	20%	10%	35%
Cash & Equivalents	10%	2%	20%
Other / Opportunistic	5%	0%	10%

3. Concentration Limits (Critical Compliance Rule)

No single security shall exceed 20% of total portfolio market value at any point-in-time, measured daily at market close. Positions exceeding this threshold must be reduced to compliance within 5 business days of detection, absent an approved temporary waiver from the Chief Investment Officer. This is the portfolio's single most-monitored constraint given its concentrated mandate.

Sector concentration is capped at 40% for any single GICS sector (currently binding for Information Technology holdings). Cash may not fall below 2% except during active reallocation windows not exceeding 3 business days.

4. Prohibited Investments

The mandate prohibits: (a) derivatives for speculative purposes (hedging only, with CIO pre-approval), (b) leverage/margin borrowing beyond settlement float, (c) private/illiquid securities, (d) short selling.

5. Review Cadence

Portfolio holdings are reviewed daily by the risk desk against this mandate. A full mandate compliance review occurs quarterly with the Investment Committee. Any breach of the concentration limit in Section 3 must be escalated to Compliance within 1 business day of detection, logged in the breach register, and remediated per the timeline above.
